

Technology Stack

Date	28 June 2026
Team ID	-
Project Name	Smart Lender
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	HTML, CSS	Simple and responsive user interface.

2	Backend / Server-Side	<i>Python, Flask</i>	<i>Lightweight framework for ML deployment.</i>
3	Database / Data Storage	CSV Dataset	<i>Simple and suitable for machine learning training.</i>
4	Cloud / Hosting / Deployment	<i>Localhost (VS Code)</i>	Easy development and testing.
5	Version Control & CI/CD	<i>Git & GitHub (optional)</i>	Source code management and collaboration.
6	Third-Party APIs / Other Tools	Anaconda, VS Code, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Pickle	Data preprocessing, visualization, model training, evaluation, and deployment.
